PATENT COOPERATION TREATY

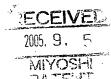

From the INTERNATIONAL BUREAU

NOTIFICATION OF TRANSMITTAL OF COPIES OF TRANSLATION OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (CHAPTER I OR CHAPTER II OF THE PATENT COOPERATION TREATY)

(PCT Rule 72.2)

To:

NAKAMURA, Tomoyuki c/o Miyoshi International Patent Office Toranomon Kotohira Tower 2-8, Toranomon 1-chome Minato-ku, Tokyo 105-0001 **JAPON**

Date of mailing (day/month/year) 01 September 2005 (01.09.2005)

Applicant's or agent's file reference

JSONY-486PCT

International application No. PCT/JP2003/016339 IMPORTANT NOTIFICATION

International filing date (day/month/year) 19 December 2003 (19.12.2003)

Applicant

SONY CORPORATION et al

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

CN, KR

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

US

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

* If item	1 4 арр	lies, some or all of those sheets may be marked "superseded."					

International application No.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

PCT/JP03/16339

	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1. Statement						
Novelty (N)	Claims	1, 2, 4, 6	YES			
	Claims		NO			
Inventive step (IS)	Claims		YES			
Industrial applicability (IA)	Claims	1, 2, 4, 6	NO NO			
	Claims	1, 2, 4, 6	YES			
	Claims		NO			

2. Citations and explanations (Rule 70.7)

Document 1: JP, 8-37778, A (Sony Corp.), 6 February, 1996 (06.02.96)

Document 2: JP, 2002-64981, A (Sony Corp.), 28 February, 2002 (28.02.02)

Document 3: JP, 3-15269, A (Fuji Electric Co., Ltd.), 23 January, 1991 (23.01.91)

Document 4: Microfilm of the specification and drawings annexed to the written application of Japanese Utility Model Application No. 108886/1990 (Laid-open No. 64989/1992), (Fuji Electric Co., Ltd.), 4 June, 1992 (04.06.92)

Document 5: JP, 2002-247852, A (Sony Corp.), 30 August, 2002 (30.08.02)

Document 6: JP, 2001-333574, A (Matsushita Electric Industrial Co., Ltd.), 30 November, 2001 (30.11.01)

Document 7: JP, 2002-112542, A (Fujitsu General Ltd.), 12 April, 2002 (12.04.02)

The subject matters of claims 1 and 2 do not appear to involve an inventive step in view of documents 1-3 cited in the ISR. Because (1) a switching power-supply circuit having a power-factor improvement circuit, described in document 1, (2) a switching power-supply circuit having both (a) a constant-voltage control means using frequency control and (b) a constant-voltage control means using inductance control, described in document 2, and (3) a constitution of switching power-supply circuits, described in document 3, wherein a plurality of switching power-supply circuits each having (a) a plurality of output parts and (b) a switching means to control the timing of supply on one of the said output parts, are provided in parallel, wherein the said plurality of output parts of each of the said plurality of switching power-supply circuits are activated in a particular order, belong to technical fields closely related to one another, a person skilled in the art could have easily conceived of the idea of applying a constant-voltage control means using frequency control and a constant-voltage control means using inductance control, both described in document 2, and a means described in document 3 whereby a plurality of switching power-supply circuits are so constituted in parallel connection as to obtain a plurality of direct-current output voltages wherein the plurality of output parts are activated in a particular order, to a switching power-supply circuit having a power-factor improvement circuit, described in document 1.

The subject matter of claim 4 does not appear to involve an inventive step in view of documents 1-3 and 5 cited in the ISR. A switching power-supply device having a rectifying means to switch between voltage-doubling rectifying operation and equal-voltage rectifying operation is described in document 5.

The subject matter of claim 6 does not appear to involve an inventive step in view of documents 1-3 and 5-7 cited in the ISR. Using a plurality of output voltages of a switching power-supply device for drive-power supply for a plasma display device is well known, as described in documents 6 and 7.
